

CLAIMS

What is claimed is:

- 1 1. A storage bin comprising:
 - 2 a. a container; and
 - 3 b. a label holder configured to rotatably and detachably couple with the
 - 4 container.

- 1 2. The storage bin of claim 1, wherein the storage bin further comprises a lid
- 2 configured to mate with the container so as to create a positive seal.

- 1 3. The storage bin of claim 2, wherein the lid further comprises a tab configured to
- 2 facilitate removal of the lid from the container.

- 1 4. The storage bin of claim 1, wherein the container is substantially rectangular.

- 1 5. The storage bin of claim 1, wherein the storage bin is uniformly formed from a
- 2 homogenous material.

- 1 6. The storage bin of claim 1, wherein the label holder is further configured to hold
- 2 and allow insertion and removal of a label.

- 1 7. The plastic storage bin of claim 6, wherein the label ranges in size from 3" x 5" to
- 2 8.5" x 11".

- 1 8. The plastic storage bin of claim 6, wherein the label ranges in size up to 8.5" x

2

11".

1

9. The storage bin of claim 1, wherein the label holder is further configured to slideably engage with the container.

2

1

10. A storage bin comprising:

2

a. a chamber configured for storing;

3

b. a rotatably attachable label holder; and

4

c. a label securing structure configured to detachably couple the attachable label holder to the chamber.

5

1

11. The storage bin of claim 10, wherein the storage bin further comprises a lid configured to detachably couple with the chamber.

2

1

12. The storage bin of claim 10, wherein the chamber further comprises one or more handles coupled to the chamber.

2

1

13. The storage bin of claim 10, wherein the storage bin is uniformly formed from a homogenous material.

2

1

14. The storage bin of claim 10, wherein the label holder is clear.

1

15. The storage bin of claim 10, wherein the label holder is configured to hold a 3" x 5" card.

2

1

16. The storage bin of claim 10, wherein the label holder is uniformly formed from a rigid plastic.

2

- 1 17. A plastic storage bin comprising:
- 2 a. hollow body with a front end and a rear end, wherein the hollow body
- 3 further comprises a first securing structure on the front end; and
- 4 b. a label holder comprising a second securing structure, wherein the first and
- 5 second securing structures are configured to mate and detachably secure
- 6 the label holder with the hollow body.
- 1 18. The plastic storage bin of claim 17, wherein the hollow body is generally
- 2 parallelepiped-shaped.
- 1 19. The plastic storage bin of claim 17, wherein the label holder is configured to
- 2 allow a 3" x 5" card to be inserted and removed therefrom.
- 1 20. A labeled storage apparatus with comprising:
- 2 a. a container comprising integrally formed inner walls and outer walls;
- 3 b. one or more label holders rotatably and detachably coupled to the outer
- 4 walls and configured to hold a label; and
- 5 c. a lid configured to detachably couple with the container.
- 1 21. The labeled storage apparatus of claim 20, wherein the label comprises a 3" x 5"
- 2 card.
- 1 22. The labeled storage apparatus of claim 20, wherein the label comprises paper with
- 2 a size in the range of 3" x 5" to 8.5" x 11".
- 1 23. The labeled storage apparatus of claim 20, wherein the label ranges in size up to

2 8.5" x 11".

1 24. The labeled storage apparatus of claim 20, wherein the container is in a
2 substantially rectangular shape.

1 25. The labeled storage apparatus of claim 20, wherein the lid couples to the container
2 through a locking structure that frictionally engages so as to create a positive seal.

1 26. The labeled storage apparatus of claim 20, wherein the apparatus further
2 comprises one or more guiding means configured to detachably couple with the
3 outer walls.

1 27. The labeled storage apparatus of claim 20, wherein the apparatus is uniformly
2 formed from a homogenous material.

1 28. The labeled storage apparatus of claim 27, wherein the homogenous material
2 comprises a polymer resin.

1 29. The labeled storage apparatus of claim 27, wherein the homogenous material
2 comprises polypropylene.

1 30. The labeled storage apparatus of claim 27, wherein the homogenous material
2 comprises a liquid impervious plastic material.

1 31. The labeled storage apparatus of claim 20, wherein the lid further comprises a tab
2 configured to facilitate removal of the lid from the apparatus.

- 1 32. A storage bin comprising:
- 2 a. a container means comprising an inside and an outside, wherein the inside
- 3 comprises a main chamber configured for storing;
- 4 b. a lid configured to cooperatively engage with the container means;
- 5 c. a label holder securing means comprising a plurality of apertures, wherein
- 6 the label holder securing means is coupled to the outside of the container;
- 7 and
- 8 d. a label holder configured for holding a label and comprising a plurality of
- 9 protrusions, wherein the label holder is configured to rotatably and
- 10 detachably couple with the label holder securing means by cooperatively
- 11 engaging the plurality of protrusions with the plurality of apertures.
- 1 33. The storage bin of claim 32, wherein the label comprises paper with a size in the
- 2 range of 3" x 5" to 8.5" x 11".
- 1 34. The storage bin of claim 32, wherein the label ranges in size up to 8.5" x 11".
- 1 35. The storage bin of claim 32, wherein the lid and the container means further
- 2 comprise a locking structure configured to frictionally engage so as to create a
- 3 positive seal.
- 1 36. A label holder configured to hold and allow insertion and removal of a label,
- 2 wherein the label holder comprises one or more securing structures configured to
- 3 mate and rotatably and detachably secure the label holder with a container.
- 1 37. The label holder of claim 36, wherein the one or more securing structures
- 2 comprise a plurality of protrusions configured to cooperatively engage with a

3 plurality of apertures.

1 38. The label holder of claim 36, wherein the label holder is clear and is uniformly
formed from a rigid plastic.

1 39. The label holder of claim 36, wherein the label holder is uniformly formed from a
2 semi-rigid material.

1 40. The label holder of claim 36, wherein the label is a 3" x 5" card.

1 41. The label holder of claim 36, wherein the label is a paper with a size in the range
2 of 3" x 5" to 8.5" x 11."

1 42. The label holder of claim 36, wherein the label ranges in size up to 8.5" x 11".

1 43. The label holder of claim 36, wherein the label holder further comprises:

- 2 a. an open top;
- 3 b. a left side;
- 4 c. a right side;
- 5 d. a bottom side;
- 6 e. a front side; and
- 7 f. a rear side, wherein the rear side comprises an inward-facing lip
8 configured to partially extend toward the center of the label holder from
9 the right, left, and bottom sides.
